OBJECTIVE

Third-year Software Engineering student seeking a Backend Developer Internship. Eager to apply and strengthen practical skills in Java, Spring Boot, database design, RESTful API development, and backend system architecture. Passionate about building secure, efficient, and scalable server-side applications while contributing to real-world projects in a collaborative development environment

EDUCATION

Software Engineering

Vietnam–Korea University (VKU) – University of Da Nang

2023 – Expected 2028

GPA: 3.5 / 4.0

ACHIEVEMENTS

- Merit Scholarship, Vietnam–Korea University (VKU) — 1 semester.
- Encouragement Prize, RoboCar Competition at VKU, 2025.

SKILLS

Java: Java Core, OOP, Collections, Exception Handling, Java I/O, JDBC

Backend Development: Spring Boot, Spring Security, Spring Data JPA/Hibernate, RESTful APIs

Web: HTML5, CSS3, Bootstrap, JavaScript, Thymeleaf

Databases: PostgreSQL, MongoDB, MySQL, Supabase.

Infrastructure & Tools: Docker, Git, Postman, Linux (Ubuntu)

PROJECTS

SPOSTICAST – Audiobook Mobile Application

01/2025 – 06/2025

Full-Stack Developer | Solo Project

Stack: Java 21, Spring Boot 3, Spring Security, JWT, MySQL, Kotlin, Jetpack Compose, MVVM, Retrofit, FPT.AI

- Developed a full-stack audiobook and podcast platform using Spring Boot and Kotlin Jetpack Compose.
- Built RESTful APIs for managing users, audiobooks, chapters, playlists, and content access.
- Implemented authentication and authorization with Spring Security, JWT, BCrypt, and email OTP verification.
- Implemented MVVM-based state management with Coroutines and Flow, integrated Retrofit for REST API communication, and persisted JWT sessions for authenticated access.
- Integrated FPT.AI Text-to-Speech to convert OTP codes into audio and deliver accessible verification emails.
- Developed administrative features for user management, content moderation, and chapter access configuration.

Job Portal Web Application

12/2025 – 3/2026

Full-Stack Developer | Solo Project

Stack: Java 21, Spring Boot 3, Spring MVC, Spring Security, Spring Data JPA/Hibernate, Thymeleaf, MySQL, Maven, Bootstrap, jQuery

- Developed a Job Portal web application using Spring Boot, Thymeleaf, Spring Security, JPA/Hibernate, and MySQL.
- Implemented role-based authentication and authorization for recruiters and job seekers.
- Built features for job posting management, job search and filtering, job applications, saved jobs, and profile management.
- Supported CV upload and download, candidate skill management, and a recruiter dashboard for managing job postings and applicants.
